# Nature Programs

**Animal Habitats - Grades K-5;** Program length: 1 hour

During this interactive program, students will learn what makes a habitat and why all animals need habitats to survive.

**Explore Raptors - Grades 3-Adult;** Program length: 1 hour

Using live birds, participants will learn the characteristics of birds of prey, their role in the ecosystem.

**Hop, Slither, & Crawl! - Grades K-8;** Program length: 1 hour,  
Ky. amphibians and reptiles are fascinating animals uniquely adapted for life. Students will learn to classify reptiles and amphibians, their various adaptations, and even their communication.

**It's Not Easy Being Green- (frogs) Grades PreK-2;** Program length-30 minutes; Discover what it's like being a frog in the Midwest. Participants will learn about frog basics from our resident tree frogs, experience what frogs feel like, and view live frogs.

**Low Ropes Challenge Course- Grade 6-Adult**

Program length: see description; Offered year-round- weather permitting. Instill group cooperation, problem-solving, critical thinking skills while encouraging physical activity. Special fees apply: **Half Day 2-3 hours \$80.00 per 16 participants Full Day 3-5 hours \$120.00 per 16 participants**

**Nature Journaling- Grades 1-8;** Program length (Grades 1-3/ 1 hr, Grades 3-Adult/ 3 hours) Discover a path of individualized exploration of the natural environment and possibly even your schoolyard. Learn historical significance of other nature journalists, like John James Audubon.

**Nature's Hide and Seek - Grade PreK-2;** Program length: PreK-K - 30 minutes, Grades 1&2-1 hr.

Although many of us like to play hide and seek, in nature it's a matter of survival. To hide from their predators, animals try to camouflage themselves. Learn how color, shape, and size help wildlife blend into their surroundings. Weather permitting

**Nature Scavenger Hunt Grades Pre K-K;** Program length: 45 min. (Offered April-October) On this brief adventure, students will see, smell, touch, and listen for specific natural wonders found at Audubon State Park. Students will learn how these components are needed to create a healthy home for the forest's inhabitants.

**Spectacular Birds! Grades 1-7** Bring out your flock and learn about the spectacular features of birds. Some topics may include: bird bill shapes, raising young birds, migration, bird banding, and more.

**Seasons of Change~Nature Hike- Grades PreK-8**

Discover what's happening in nature that makes a particular season unique. **Further info: Julie McDonald [juliea.mcdonald@ky.gov](mailto:juliea.mcdonald@ky.gov)**
